DETAILED ACTION

- This office action is responsive to the Request for Continued Examination filed on 12/01/2008.
- The amendments received on 12/01/2008 have been entered and made of record.
- Claims 1, 3-5, 13-16, 18-20 and 28-30 are currently pending.

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/01/2008 has been entered.

Response to Arguments

2. Applicant's arguments filed on 12/01/2008, with respect to the cited prior art and the amended independent Claims 1 and 13, have been fully considered and are persuasive. The examiner has found that the cited prior art fails to teach a raster image processor having the capability to parse a font data file for a specific printer job language command, decode the font data of a particular format and process the font data in accordance to the parsed printer job language command. Therefore, the previous rejections of Claims 1, 3-5, 13-16, 18-20 and 28-30 have been withdrawn.

Allowable Subject Matter

3. **Claims 1, 3-5, 13-16, 18-20 and 28-30** are allowed.
4. The following is a statement of reasons for the indication of allowable subject matter:
5. The prior art of record does not teach, disclose or suggest a method for managing multiple format fonts in an image generating device, including the claim limitations of (in combination with all other limitations in the claim), the step for “selectively generating a new non-bitmapped font file such that: when the font to be stored is a PostScript font, pre-appending selected PostScript language command to the font data to create a new font file; when the font to be stored is a Printer Command Language (PCL) font, pre-appending selected Printer Job Language (PCL) command to the font data to create a new font file; and when the font to be stored is a supported font other than PostScript or Printer Command Language (PCL), convert the font data to Printer Command Language (PCL) font data and pre appending selected Printer Job Language (PCL) command to the font data to create a new font file” and “parsing, via the raster image processor, the pre-appended command and rasterizing the new non-bitmapped font file in accordance to the command”, as claimed in **Claim 1**. This method would eliminate the need to convert the font data into a supported format before downloading, or embedding the font data information into the print jobs when printing documents with fonts in unsupported formats. This method increases the flexibility of a printing apparatus in terms of processing and managing font data of different formats. The flexibility would allow for a more efficient print process when printing documents with different font formats. Similar features are claimed in Claims 3-5, 13-16, 18-20 and 28-30. Therefore, **Claims 3-5, 13-16, 18-20 and 28-30** are allowable over the prior art of record for the same reasons.

Art Unit: 2625

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
